

Outcomes of the Executive Sponsors Training

- Understanding the roles and responsibilities of Executives Sponsors
- Defining PI initiatives that are most crucial to your growth and success
- Ensure PI goals are feasible, meet overall business strategy, and meet strategic goals
- Securing buy-in from team members, periodically evaluate projects, and provide constant constructive feedback
- Sustaining all implemented improvements

Coaching and mentoring are essential in building capability. RPM Exec's Master Black Belts provide onsite and offsite support.

Who We Are

Our Mission: Create High Reliability Organizations which compete on outcomes safely

RPM Exec is proud to provide individual certification based on results –not just training. The certification is by a Certified Motorola Master Black Belt –the organization that created Six Sigma.

Executive Leader Development Program Overview

Engaged sponsors are essential to leading change. Sponsors are responsible for guiding strategic selection of improvement, securing resources and ensuring that initiatives are timely and stay within scope. As strategies adapt to the rapidly changing landscape, Process Improvement (PI) will become all the more critical to sustaining our mission and serving your customers. PI won't achieve the breakthroughs possible, nor sustain, without executives prepared for their role in PI.

Program Participants

Participants include all the executives, and those who are expected to directly supervise the PI "Belts" trained or to be trained in the near future. These Executive Sponsors will define project scopes and provide high-level direction. They are responsible for equipping teams with necessary resources and removing roadblocks that may interfere with an initiative's progress.

RPM Exec is a full service provider for Transformations

Strategy Development & Deployment –We can build or build-on your Vision – Mission – Value – Strategy – Tactical and Utilize the 3Ms of Process Improvement** to assure the mission is accomplished.

Yellow Belt -Fundamental problem solving for all associates. 3-Day Training

Green Belt -Professional part-time problem solver. 9-Day Training includes: Lean, Six Sigma, Change Leadership Fundamentals.

Black Belt High Reliability -RPM is unique to offer a blend of PI and Reliability Engineering. Participants will be more effective at solving multi-factor issues, safety cultural development, responding to regulatory and accreditation requests or recovery actions

Master Black Belt-Executive strategic partners, responsible for ongoing development of PI within the organization and strategic stakeholders.

Safety Culture Training –Both an assessment of your culture of safety, but also improvement in your culture to get to Zero Harm.

Physician/Provider PI Certification -This course requires projects and certification to drive better clinical outcomes for patients and improved physician and provider satisfaction to stimulate growth strategies.
